# Safety Features

For your safety, this machine will not operate if the following procedures are not followed

## 3 easy steps to use the chopping bowl

1 Please ensure that the cover of the liquidiser motor is closed when using the chopping bowl.

2 Insert your blade or disc with the appropriate drive, then lock the lid into place. To do this line up the locating clip (circled) to the left of the handle and turn anti-clockwise until it locks into place.

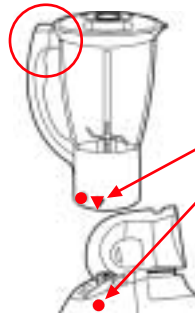

3 Place your bowl into position by seating the bowl on the centre spindle, ensuring that the handle of the bowl is positioned slightly to the front as shown. Turn the bowl anti-clockwise until it clicks into place, (please ensure the lid locating clip is lined up with the handle, see step 2), this is a small movement and feels tight/stiff for the first couple of operations. The machine is now ready to switch on.

## 2 easy steps to use the liquidiser

1 The liquidiser cannot be positioned on the appliance unless the lid is fully locked. Line up the location clip (circled) to the left of the handle and turn anti-clockwise until it locks into place (this is a small movement and feels tight/stiff for the first few uses).

2 Lift the cover of the liquidiser motor, place the symbol ▼ on the jug onto the ● symbol on the appliance. Then turn the jug anti-clockwise to line up the two ● symbols. The machine is now ready to switch on.

Note: you cannot use the liquidiser and chopping bowl at the same time.
