## Small, but perfectly formed

### New compact Moulinex food processor

Food processors are a great boon for any enthusiastic cook but often they are relegated to the bottom of a kitchen cupboard, simply because they are too large and unwieldy to use on a regular basis. Not any more. Moulinex, masters in the art of food preparation, have launched the **Iseo** - a revolutionary, space-saving compact food processor that has been designed for everyday use without any compromise on performance.

To make it as easy as possible to use, the **Iseo** comes with a number of ingenious features, the first of which is a bowl with a unique food 'chute' top called 'direct service'. This means that, once the food is processed, it is automatically delivered quickly and hygienically into a bowl or onto a plate without any waste or messy accidents.

The second clever feature means no more searching around in a drawer for your processor blades. The **Iseo** comes with a tool storage drawer which is integral to the machine. It houses both thick and thin shredding blades and a chip-making blade so they are always instantly on tap.

Other features include:

- 1.8 litre processor bowl with safety lid
- One speed action with pulse button
- 450 watts power
- Thick shredding blade
- Thin shredding blade
- Chip-making blade
- Knife blade for chopping
- Whisking disk
- Citrus juicer attachment

The **Moulinex Iseo** has an RSP of £49.99.
