## Clever cook!

### Moulinex launches new food preparation machine

If you want to prepare food fast but don't want bulky complicated machines, the experts at Moulinex have come up with another first - a hand blender with a food processor attachment.

The Optipro DDF6 is one of the most versatile food preparation gadgets on the market – and a great space saver. Designed to easily tackle a range of tasks, such as slicing vegetables, blending soup, whisking pancakes, grating cheese and kneading dough, this compact piece of kit will help speed up the process.

The stylish stainless steel blender has an anti-scratch foot so it won't damage the surfaces of non-stick pans, and with six speeds and a turbo button to choose from, you will be able to select the perfect speed to prepare each dish.

The 700w Optipro DDF6 comes with an extra large 1.5 litre processor bowl, perfect for soups and sauces, a stainless steel multi whisk for delicious pancakes and desserts and a 150ml mini chopper which can efficiently cut through a range of foods including vegetables, nuts and herbs.

Changing attachments is easy as it has an eject button which releases them with one easy click.

With an ergonomic design, it's comfortable to use with soft touch grip areas and buttons, and the flexibility of right-handed and left-handed positions to keep the mains lead out of the way.

The Optipro DDF6 will be available from all leading electrical retailers from March priced £59.99.
